## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-3 and 11-16 in the reply filed on June 12, 2006 is acknowledged. Furthermore the election of Species I, claims 1-3 is acknowledged. Original species I is more accurately drawn to claims 1-5 and as such action on the merits of claims 1-5 follows.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

3. The information disclosure statement filed November 3, 2003 has been placed in the application file and the information referred to therein has been considered as to the merits.

### ***Drawings***

4. The drawings received September 17, 2003 are acceptable for examination purposes.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites a packaging unit having a first area, carrying a housing recess for accommodating the battery device therein, a second area formed in continuation to the first area, and a third area formed in continuation to the second area substantially at right angles to the first area.

The arrangement of the three areas is not explicitly clear. First it is unclear how the areas can be at plural right angles as recited in the claims. Second it is unclear if the plural right angles refer to the third area alone or to both the second and third area relative to the first area. If it is the former, then again the plurality of right angles is not understood. If it is the latter, this arrangement is unclear since the second area is not at a right angle with respect to the first area (see Fig. 3 for example). Clarity is respectfully requested.

### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-6 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of copending Application No. 10/834532. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Both the instant application and copending Application No. 10/834532 claim the same battery pack and notably the same battery packaging unit. Thus the invention of each of these applications is not patentably distinct from one another.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP 11-265693 discloses folding 2<sup>nd</sup> and 3<sup>rd</sup> sides over a first side to enclose a battery however the sides are arranged differently than that of claim 1.
